Accident Reconstruction Professional 15

For Windows 10, 8/8.1, and 7

Streamlined with a fast, easy and efficient work flow for today's busy reconstructionists.

The screenshot displays the Accident Reconstruction Professional 15 software interface. The main window shows a project titled "PROJECT - A Sample Recon Case" with tabs for "General Info", "Accident Info Pg 1", "Accident Info Pg 2", "Vehicle/Item Info", and "90 Formulas". A list of formulas is visible, with "Delta V w/ Force Balance Formula" selected. Two calculation windows are open: "Minimum Speed" and "ΔV w/ Force Balance Formula". The "Minimum Speed" window shows inputs for Skid Distance (122.5000 ft/m) and Accel/Drag f (0.5274), resulting in a Speed of 44.0249 mph and Velocity of 64.5698 fps. The "ΔV w/ Force Balance Formula" window shows inputs for vehicle weights (3666.0000 lb/kg and 3100.0000 lb/kg) and a resulting ΔV of 19.5758 mph and 28.7111 fps. A "Coefficient of Friction" window is also visible, showing an Adjusted Coeff of 0.5274. The interface includes a search bar, a formula search function, and a project manager section at the bottom.

AR Pro 15 is built **IN** Windows 10 **FOR** Windows 10 (but is also 100% compatible and at home with Windows 8/8.1 and Windows 7).

The program has 177 formulas* (and many more formulas are slated to be added), so you won't be longing for formulas or wading through an endless sea of formulas to find the formula you need. Our formula search function will VERY quickly get you to the formula you need, as well.

With AR Pro 15's newly overhauled Project Manager, you can save all of the formulas you run for your reconstruction, quickly and easily, for instant retrieval at any point in the future. You can even share your reconstruction with anyone else who also has a recent version of AR Pro with just a few clicks of your mouse.

Tools? Yes, AR Pro 15 has the tools you need! Two vehicle specs databases, a calculator, calendar, an external conversion utility, menu selections to start your favorite word processing and CAD programs, as well as a sisters and clones PDF file. There is also quick access to the online manual, read me file, extensive help file, as well as short YouTube videos to help show you how to use everything in the program!
