

Accident Reconstruction Professional Suite

For 64-bit Windows 11, 10, and 8/8.1

NEW VERSION - NEW BUNDLE - NEW PRICE

The screenshot displays the AR Pro software interface. The main window is titled "AR PRO 360° Momentum" and contains a "SPEED/VELOCITY" section with input fields for vehicle weight, impact speed, and angles. A "Vector-Sum" section shows calculated impulse, moment, and difference values, with a rating of "Excellent!". A "Total Vehicle Weight" window is also open, showing inputs for vehicle dry curb weight, occupant weight, fuel, and other miscellaneous weights, resulting in a total weight of 4000.0000 lbs. The interface includes a top menu bar with icons for various tools and a bottom status bar with system information.

The new **AR Pro Suite** is built **IN** Windows 11 **FOR** Windows 11, but is also 100% compatible and at home with Windows 10 and 8/8.1.

The Suite is a bundle of all three Dirigo Software titles (AR Pro, Recall, and TSB) and is available as a yearly subscription for only **\$199** a year (volume discounts are available), with ALL updates and upgrades included while subscribed! Subscribers will ALWAYS have the very latest and current version of all three programs — and *no more upgrade fees!!*

AR Pro has been completely rebuilt from the ground up, and is now VERY multi-monitor friendly and capable!

AR Pro has a great and plentiful selection of formulas, two vehicle specs databases, a calculator, calendar, an external conversion utility, menu selections to start your favorite word processing and CAD programs, as well as a sisters and clones PDF file. Recall and TSB contain the entire NHTSA recall and technical service bulletin databases, and both databases are updated twice a week (because the only good database is a current database).

For more information and a link to a few short videos of the **AR Pro Suite** in action, please visit us at dirigosoftware.com

From our family to yours,
Happy Thanksgiving,
Merry Christmas,
and Happy New Year!!
